Spanner implementation evidence, 30 Oct 2026

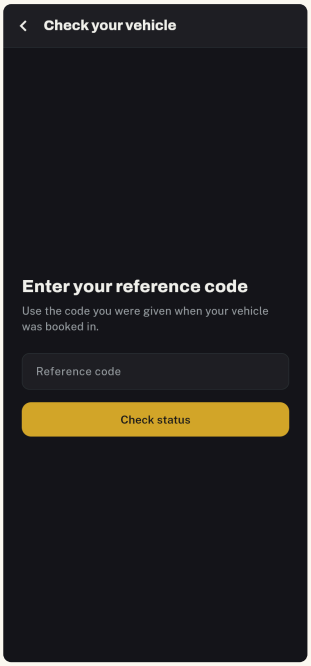

Group Y (The Zealots), ITC327W Phase 3. Riese Auto-Clinic.
Screenshots of the Flutter app (run as a web build, phone size) and the ASP.NET website (live at https://riese-auto-clinic.vercel.app), both on the **same Supabase project**. All data is dummy data (Test Customer, 060 000 0000, TEST 001 GP); other customers' details are hidden.

> **Shared process P1 (phone to website):** booking created, part and labor added on the phone are on the website (m09-m16 and w04).
> **Shared process P2 (website to phone):** phase changed on the website to Reassembly, seen on the phone's customer screen and staff screens (w10, m17-m19); then finalized on the phone and seen as "Finalized" on the website (m21, w12, w14).

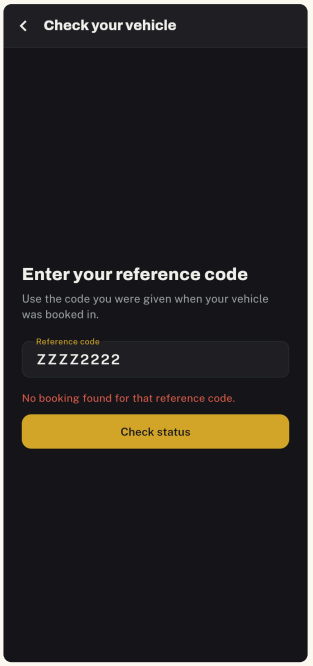

Flutter mobile app

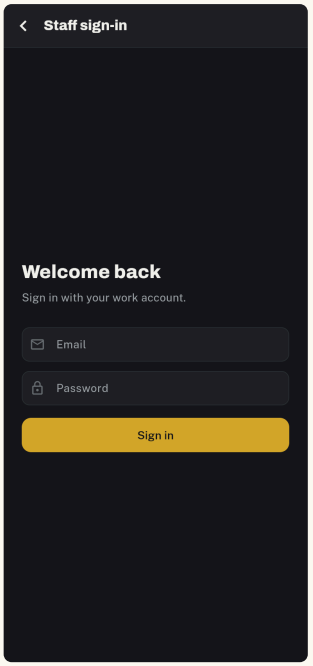

M01 Welcome screen with the Riese logo and the two entry points: customer and staff.
Flutter UI

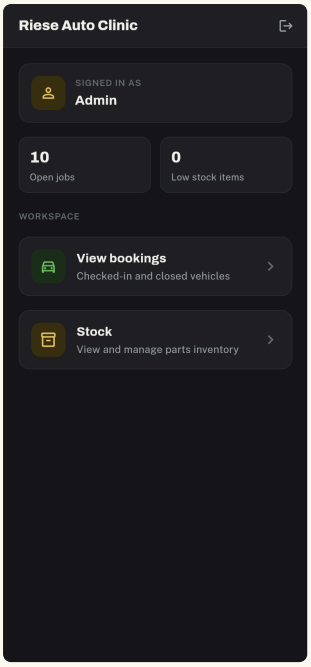

M02 Customer enters the reference code from the booking slip or WhatsApp message. No login.
FR-14

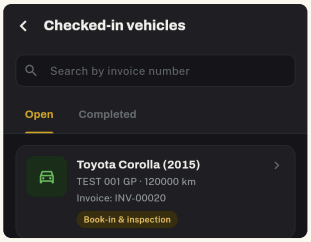

M03 Unknown code: clear message, no data revealed.
FR-14, NFR-03

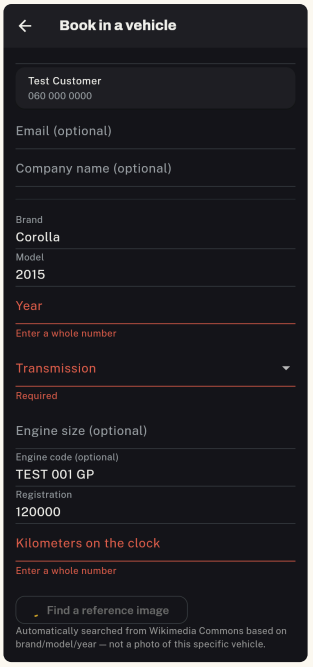

M04 Staff sign-in with Supabase Auth.
FR-12

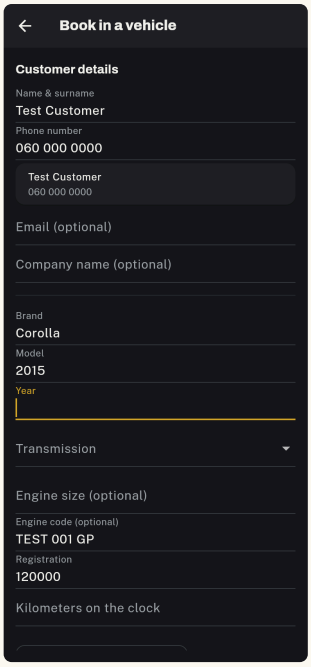

M05 Home screen, signed in as Admin: 9 open jobs read from the shared database (the website shows the same count).
FR-12, FR-09

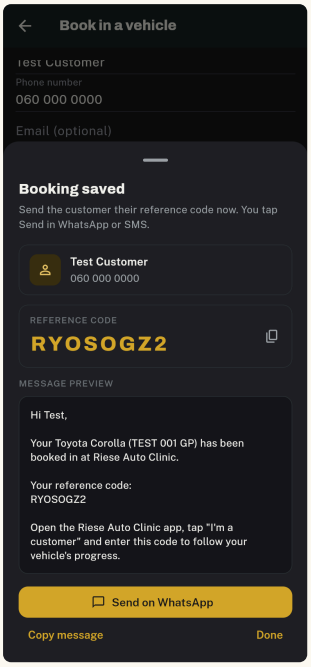

M06 Bookings list: the new dummy booking at the top (other customers hidden).
FR-11

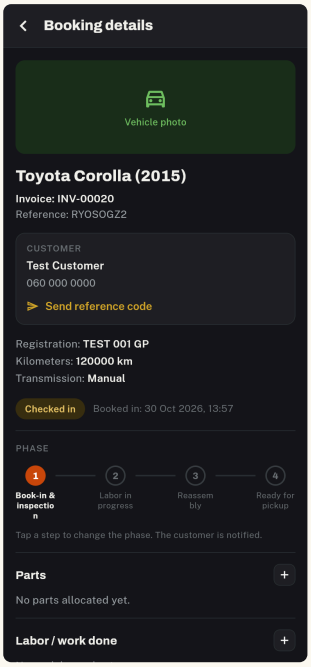

M07 Book-in form validation: "Enter a whole number" and "Required" messages.
FR-01, NFR-01

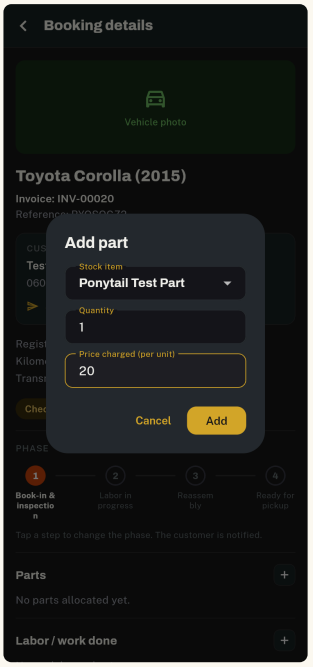

M08 Book-in form filled with dummy data (Test Customer, 060 000 0000, Toyota Corolla, TEST 001 GP).
FR-01

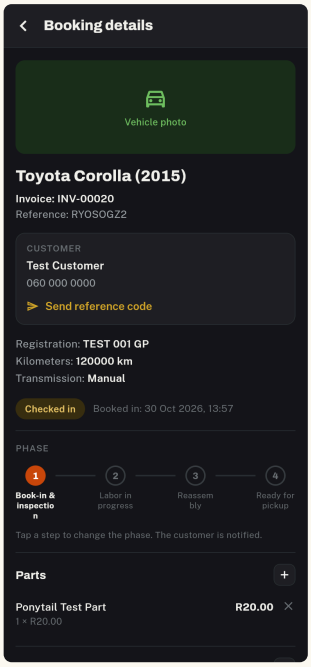

M09 Booking saved: the reference code RYOSOGZ2 and a ready-to-send WhatsApp message (Mr G, 16 Oct).
FR-01, FR-14

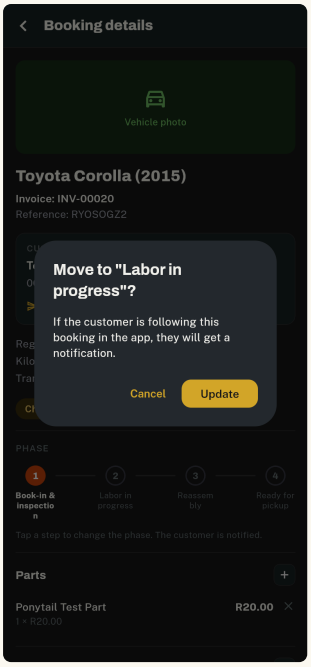

M10 Booking details: invoice INV-00020, reference code, customer, phase tracker at step 1.
FR-01, FR-15

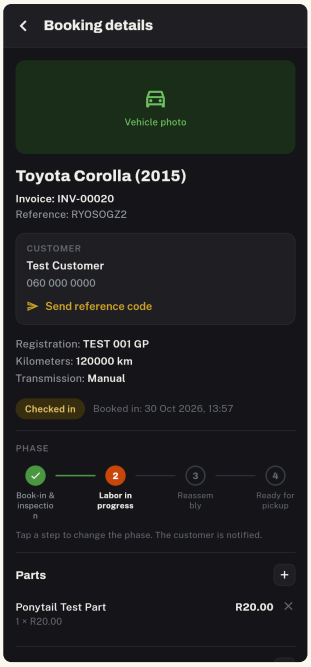

M11 Add part: stock item, quantity and price charged.
FR-04

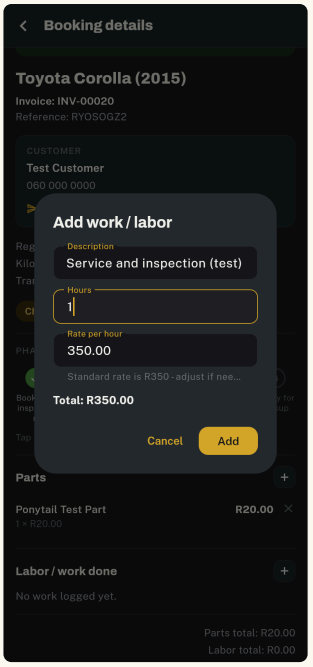

M12 Part added to the booking (R20.00).
FR-04

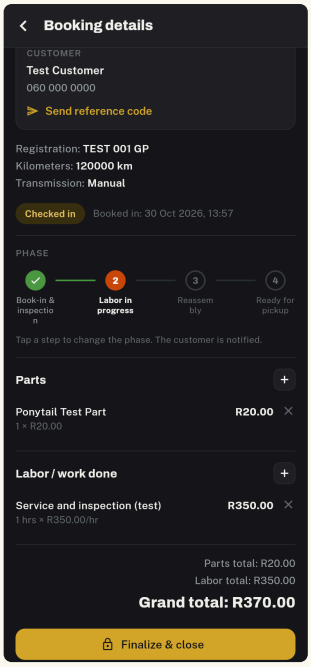

M13 Moving the booking to the next phase asks for confirmation; the customer is notified.
FR-15, FR-16

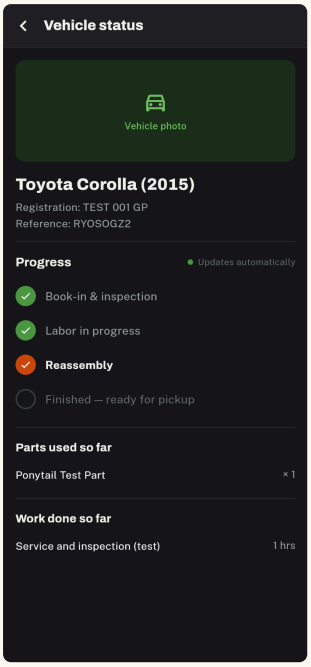

M14 Phase is now "Labor in progress".
FR-15

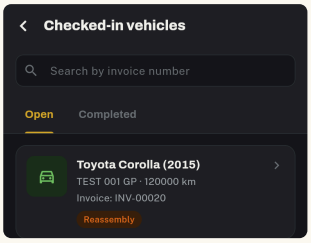

M15 Add work / labor: 1 hour at the standard R350/h gives R350.00.
FR-05

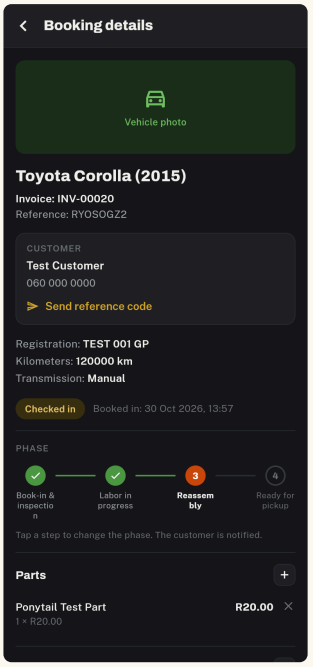

M16 Parts R20 + labor R350 = grand total R370.00; Finalize & close (admin).
FR-06, FR-17

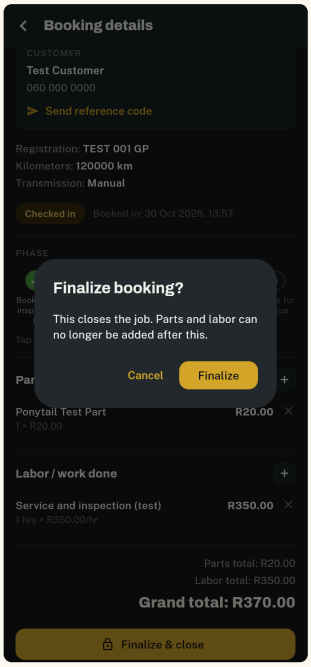

M17 Customer status screen after the WEBSITE moved the booking to Reassembly: the phone shows the new phase plus the part and work done.
Shared process P2

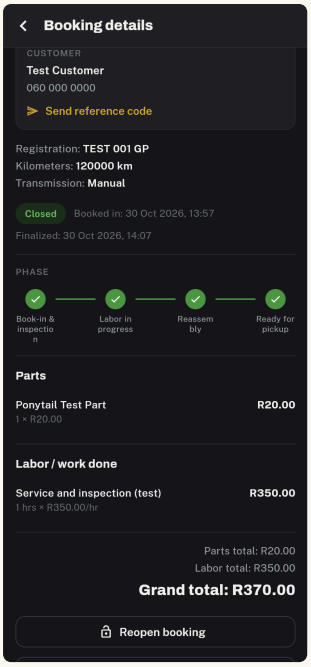

M18 Staff list shows "Reassembly", changed on the website.
Shared process P2

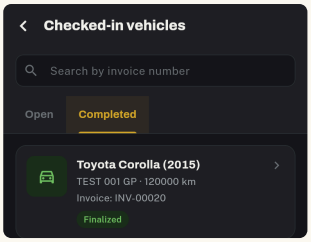

M19 Booking details: phase 3 (Reassembly) set on the website.
Shared process P1/P2

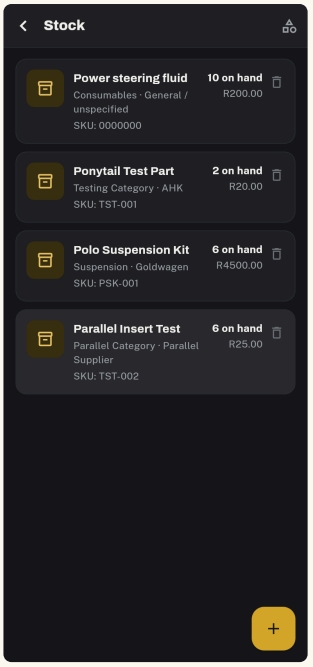

M20 Finalize confirmation (admin only).
FR-17

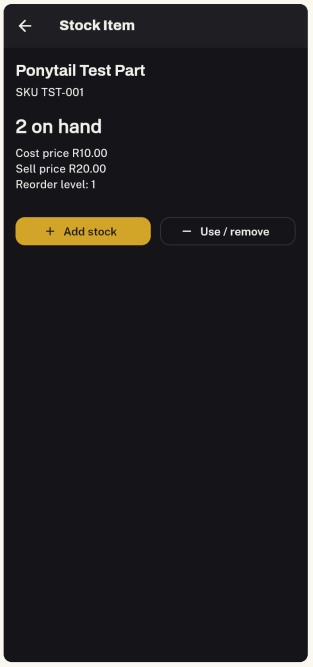

M21 Booking closed and finalized: all four steps ticked; Reopen is admin only.
FR-17

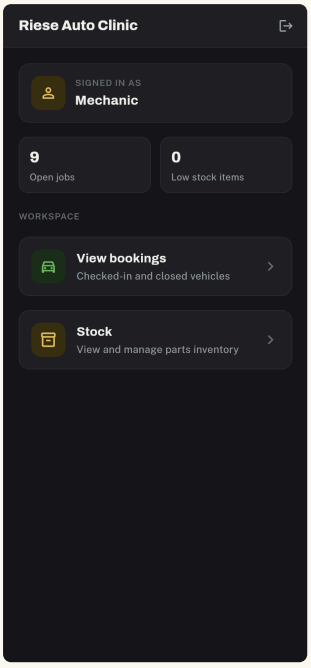

M22 Completed tab lists the finalized booking.
FR-11

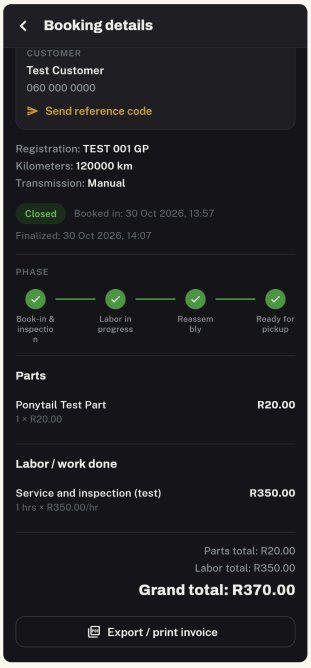

M23 Stock list with quantities.
FR-03, FR-10

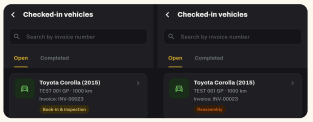

M24 Ponytail Test Part: 2 on hand (was 3 before the part was added to the booking).
FR-04, FR-10

M25 Home screen, signed in as Mechanic.
FR-12, FR-17

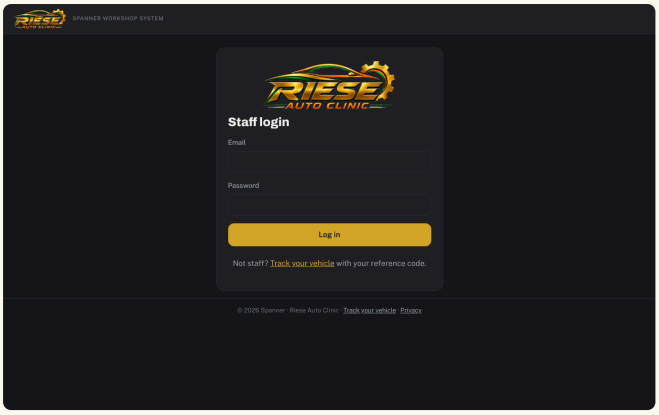

M26 Closed booking as a mechanic: only "Export / print invoice", no Reopen or Delete.
FR-17

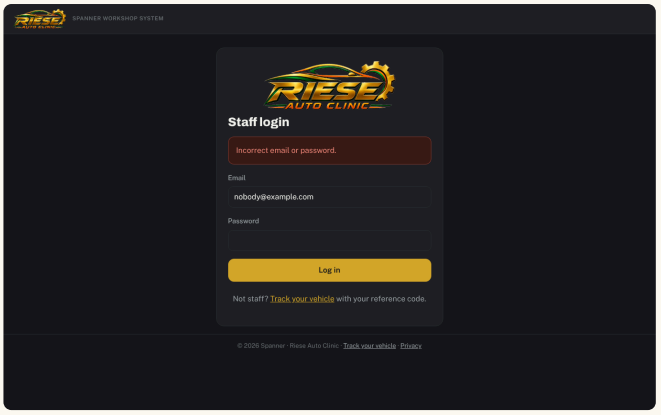

M27 Pull-to-refresh on the bookings list: the left half shows a booking at "Book-in & inspection"; its phase was then changed in the database (as the website would); after pulling down the list the right half shows "Reassembly", without restarting the app. Other customers are cropped out.
FR-09, shared process P1/P2

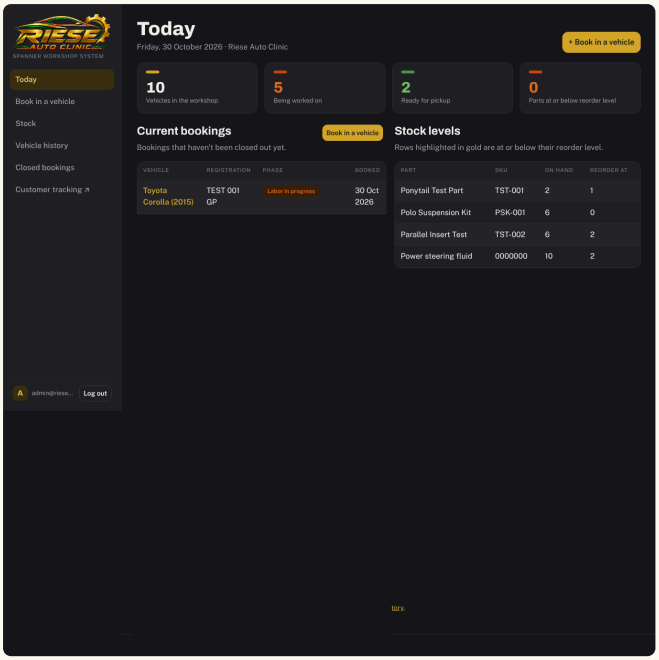

ASP.NET website

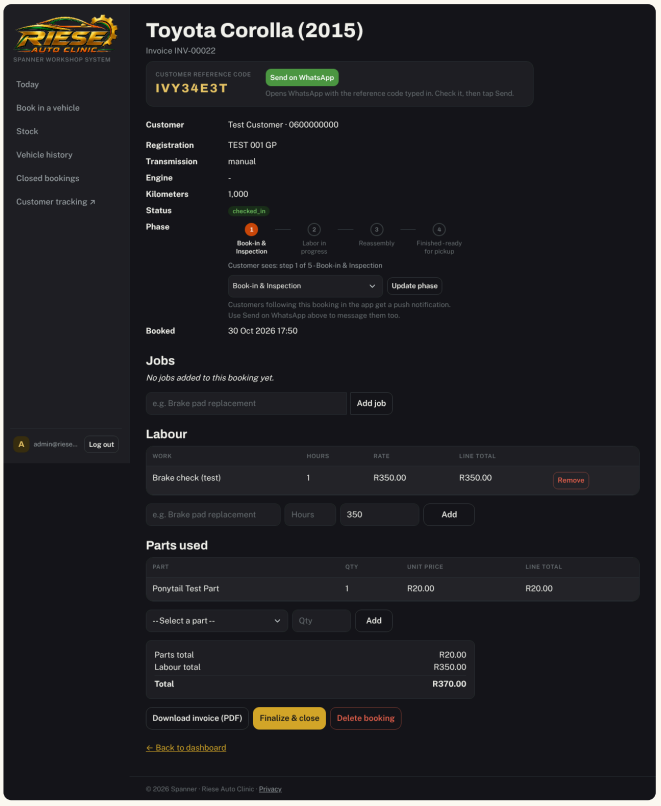

W01 Staff login page (desktop).
FR-12

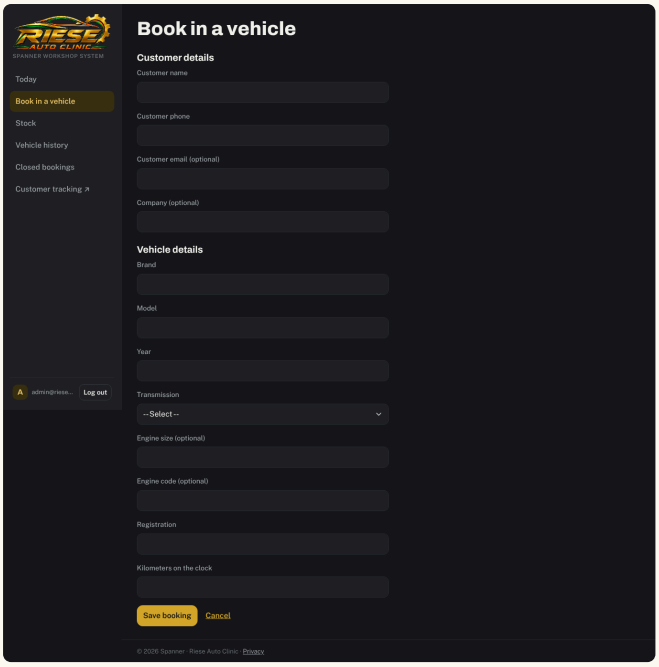

W02 Wrong password: "Incorrect email or password."
FR-12, NFR-01

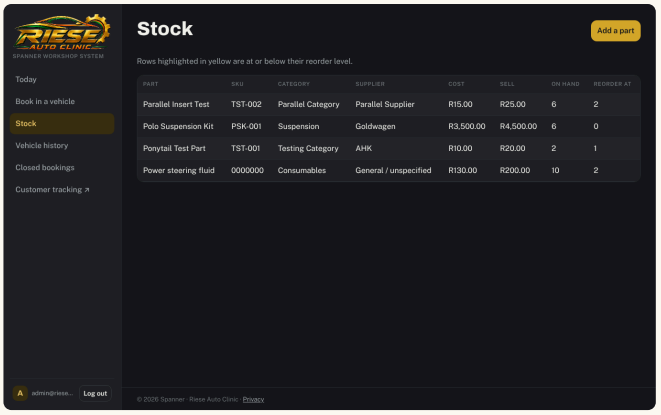

W03 Dashboard: stat cards, current bookings and stock levels (other vehicles hidden).
FR-09, FR-10

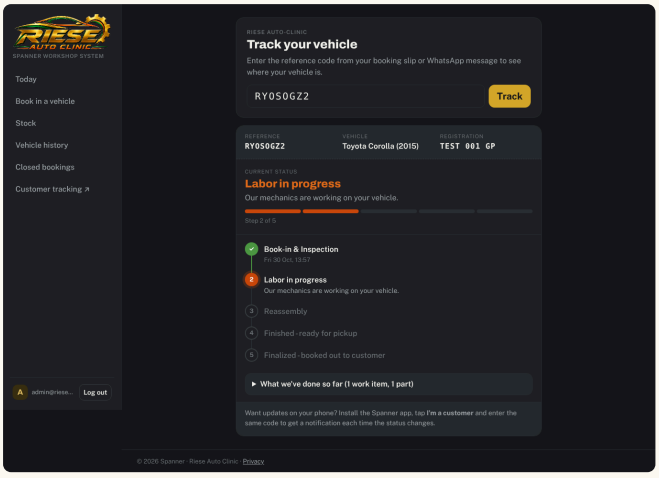

W04 Booking page on the website after the labour change: a booking with a part (R20) and labour entered the way the phone does it (R350) shows the same R370 total as the phone (m16), with the Labour section and Remove button. Taken on the live site after the 30 Oct redeploy.
Shared process P1; FR-05, FR-06

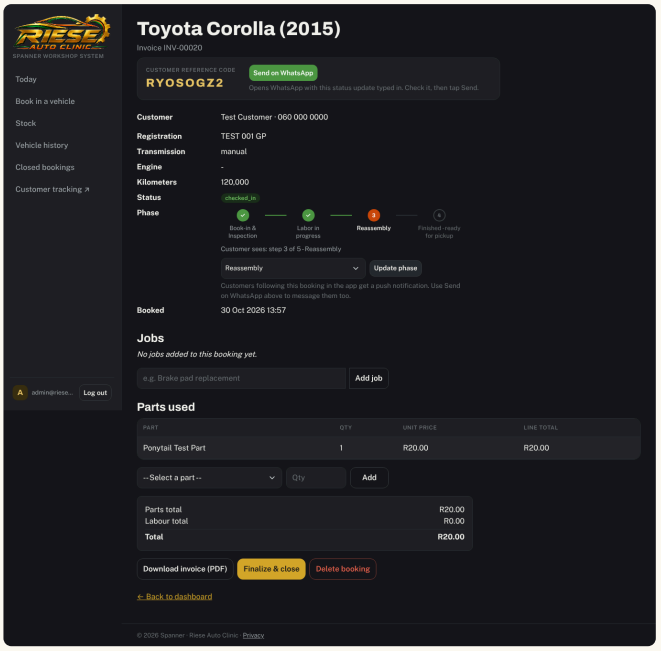

W05 Book in a vehicle (web form).
FR-01

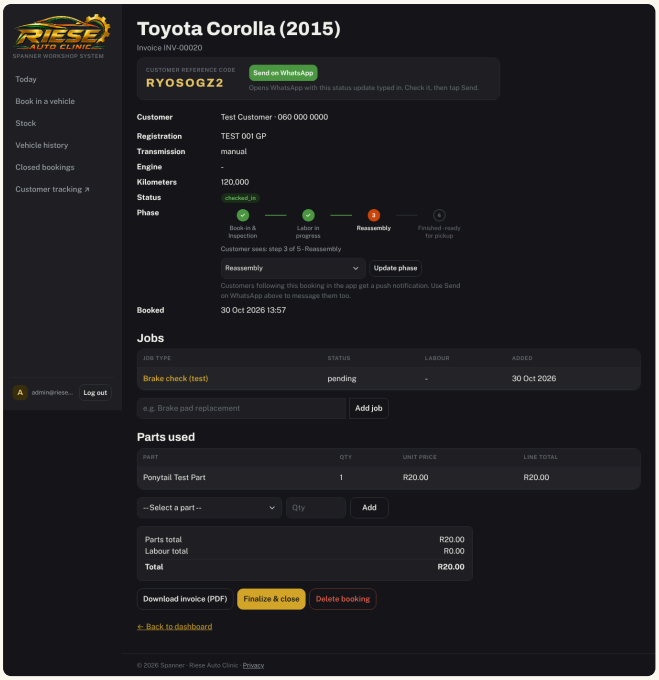

W06 Stock page (same quantities as the phone).
FR-03, FR-10

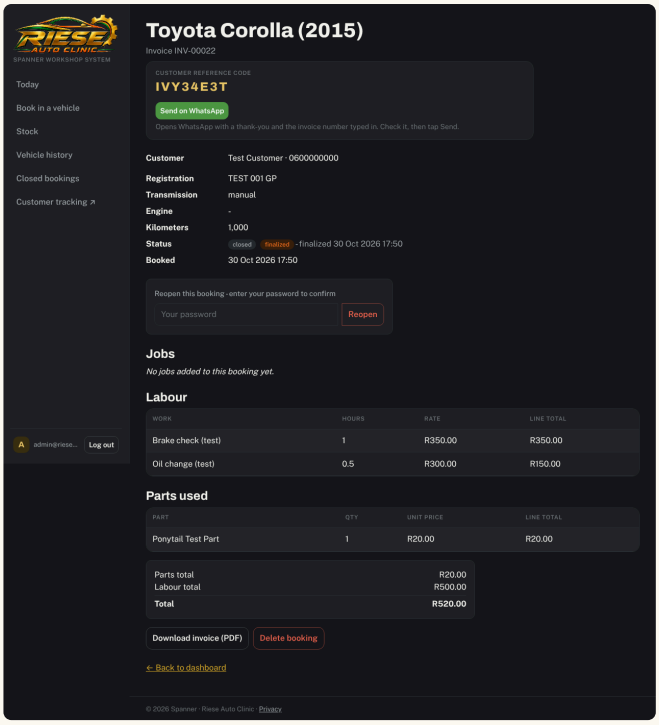

W09 Customer tracking page by reference code, no login (Labor in progress).
FR-14

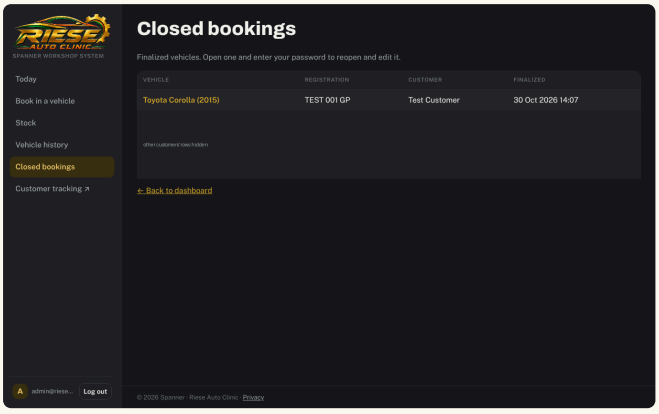

W10 Phase changed to Reassembly on the website.
FR-15; shared process P2

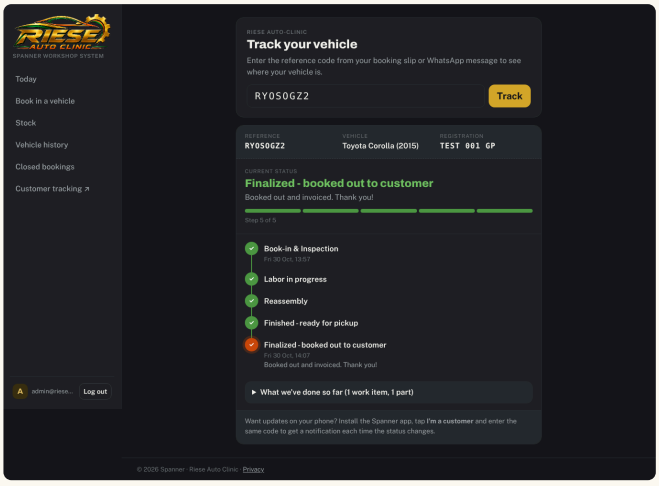

W11 Job added on the website.
FR-02

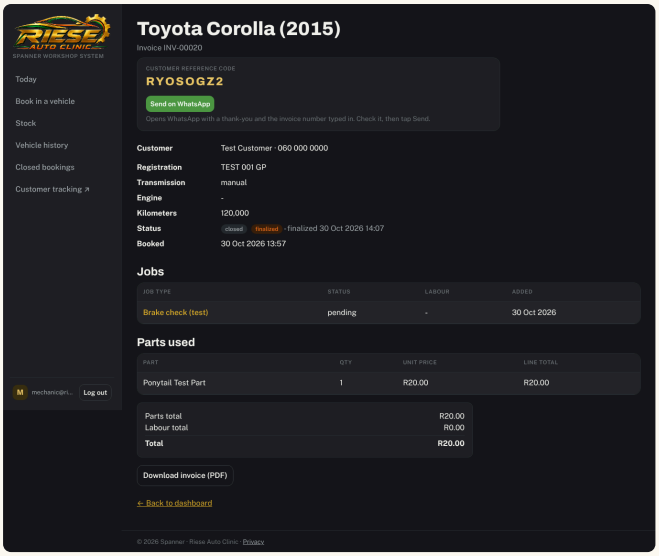

W12 Finalized booking (admin) after a web labour line was added (R500 labour, R520 total): Reopen and Delete available; WhatsApp thank-you.
FR-17

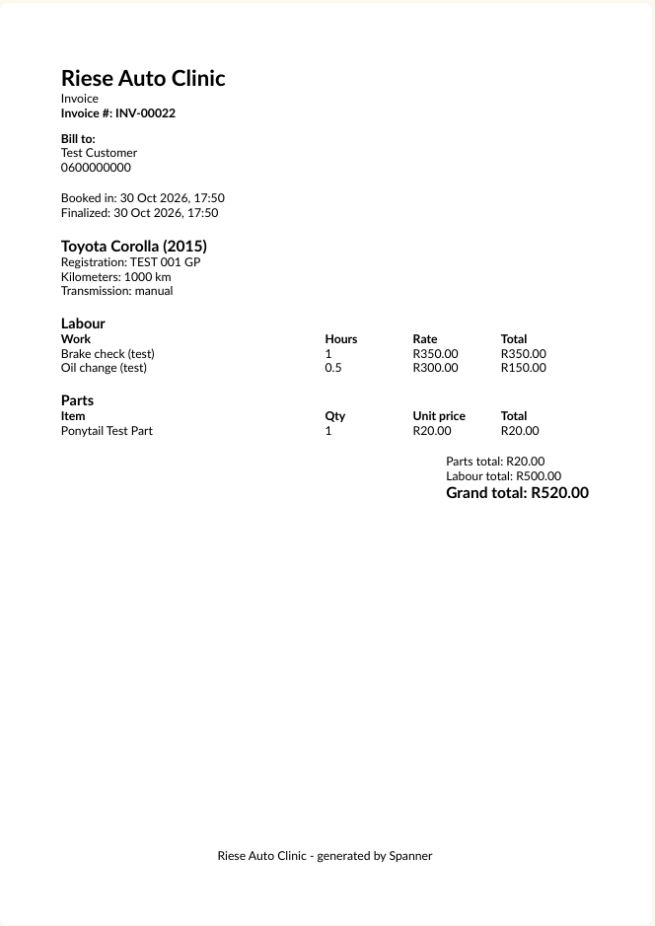

W13 Closed bookings list (other customers hidden).
FR-11

W14 Tracking page shows "Finalized - booked out to customer".
FR-14

W15 Same booking as a mechanic: no Finalize, Reopen or Delete.
FR-17

Riese Auto Clinic
Invoice
Invoice #: INV-00022

Bill to:
Test Customer
0600000000

Booked in: 30 Oct 2026, 17:50
Finalized: 30 Oct 2026, 17:50

Toyota Corolla (2015)
Registration: TEST 001 GP
Kilometers: 1000 km
Transmission: manual

Labour

Work	Hours	Rate	Total
Brake check (test)	1	R350.00	R350.00
Oil change (test)	0.5	R300.00	R150.00

Parts

Item	Qty	Unit price	Total
Ponytail Test Part	1	R20.00	R20.00

Parts total: R20.00
Labour total: R500.00
Grand total: R520.00

Riese Auto Clinic - generated by Spanner

W16 Invoice PDF generated by the website: both labour lines (one entered like the phone, one on the web) and the part, grand total R520.
FR-07

Known limitations seen while collecting this evidence

Observation	Evidence	Status
Labour was in two tables (found 30 Oct: the phone logged R350, the website showed Labour R0). Fixed the same day: the website now reads and writes the phone's table, `booking_labor`. Screenshots w04, w12 and w16 were retaken on the live site after the fix.	m16, w04, w12, w16	Fixed 30 Oct (PR #21)
Phone and website show the same phases, status values and reference code, and both reflect each other's changes.	m17-m19, w10, w14	Working
Flutter has no live updates: a change made on the website appears after the list is reloaded. Pull-to-refresh was added on 30 Oct, so pulling the list or a booking down reloads it (m27).	m18, m27	Known limitation (reload by pulling down)
Push notifications and fingerprint login need a physical Android phone and were not exercised in this web-based run.	-	Test on a phone
Vehicle reference photo (Wikimedia) could not load in the capture environment, so the vehicle shows the green "Vehicle photo" placeholder.	m10	Known limitation
